INTRODUCTION

A cabin site in the environment of Montana? This is a property with an abundant eco system comprised of Aspen groves, Pine trees, meadows, wildflowers, native grasses, and I refer to it as an "environment" property out of the wind and nature views. Cabin build sites are amongst the Aspens and Pines, with a reputation of a healthy moose population and a splendid variety of native animals (Great Horned Owl was at my 1st visit) There is a developed spring fed water system up the road that the owners have access to, for domestic water with a cistern system. The access is good for most of the year and seasonal unless a track machine is your method of winter travel - neighbor lives full time. The Peak road goes through the property allowing for multiple build site opportunities with a private road recently mowed to make it into the Aspen meadow. Views of the Crazy Mountains and Livingston (8 miles away). Forest service trailhead and trails for miles are very near. Low taxes - \$6.52 a year. Come see what this property has to offer for your MT getaway!
